

Intro to Philosophy

Term Paper Discussion

Introduction

An analysis of what God is from the perspective of Proofs of Existences

- ❑ Detour into purpose of God in a religion - Contrasts
- ❑ Wrap up with what God is to me
- ➔ Look at proofs and theories with a strong focus on the claim

Manner: Suppose this proof were valid, what would it tell us about the nature of God

Connections

- Unmoved Mover, the First Cause, the Necessary Being, the Absolute Being and the Grand Designer
- How Darwinism has a place in this argument.

Scientific justifications based on likelihood of events

➤ Supreme cause, Impressive Finality, Faith

Why did the natural world always (so far as we know) obey laws of mathematics?

❖ Chicken and Egg problem

The final picture

Concept of God in different religions

Report any overlaps, similarities, or stark contrasts

End on a personal note (This part shouldn't sound like an opinion piece)

My ideas about God:

- Inspired by probabilistic likelihood based arguments
- Some driving points on why my ideas make sense
